presentation

The Regional Ministry for Economy and Treasury, through the General Directorate for Industry, Energy and Mines, and the Regional Energy Agency of Madrid (Fundación de la Energía de la Comunidad de Madrid), calls to participate in the GeoEner Congress 2010, an initiative that aims to be a forum of meeting for scientists and technicians from research centres, universities, public administration and companies from the geothermal sector, interested in the different thematic areas related to this renewable energy source, widely developed in other European countries, analyzing the procedures of application, the equipment available in the market and the adaptation to the current regulation. Therefore all the interested actors are call to participate in the II Congress of Geothermal Energy in Building and Industry, that will be celebrated in Madrid on the 10th and 11th March 2010.

main objectives of Geoener 2010

- To provide a forum for meeting and discussion to scientists, professionals, industrials and consumers, to disseminate and share their knowledge, experiences and research on geothermal energy for building and industry.
- To transfer and exchange knowhow and experiences developed in different regions contributing to promote this renewable energy source.

thematic areas

The Thematic Areas on which the papers should be submitted are:

- I. Research of deposits and geothermal potential.
- II. Technologies and equipment.
- III. Applications to air conditioning in construction.
- IV. Industrial applications.
- V. Other applications.
- VI. Legislation and Normative.

presentation of papers

The process for the admission of papers will follow four phases:

- a) Summaries reception.
- b) Approval of the summaries by the Technical Committee.
- c) Reception of the definitive paper.
- d) Approval of the final paper by the Technical Committee.

The attendants interested in presenting their papers for the Congress should submit, before the 31st May 2009, a summary of the proposal with a maximum extension of one page in Word format, Times New Roman, size 12, simple interlineal spacing, headed by the title and the name of the authors of the paper. The left and right margins will be of 2 cm, and the top and bottom ones will be of 2.5 cm. Also, should be indicated the thematic area. This text should be sent in a file to the following e-mail address: geoener@fenercom.com.

The papers will be evaluated by a Technical Committee to verify that they fit with the contents and thematic areas of the Congress. All the authors will be informed before the 30th June 2009 of the acceptance or rejection of the proposals presented.

Proposals with exclusively commercial character will not be accepted.

For the paper presentation, at least one of the authors has to formalize its inscription in the Congress.

Summaries: before 31st May 2009

Summary approval: before 30th June 2009

Final presentation: before 31st October 2009
